CONTENTS / ABOUT LG ELECTRONICS

About LG Electronics Air Conditioning and Energy Solutions

LG manufactured their first air conditioning unit in Korea in 1968 and have remained at the forefront of HVAC innovation.

The high performance system air conditioning and heating products provide precise temperature control to residential and commercial applications across the UK.

LG offer building users and occupiers a completely efficient and comfortable environment.

LG Energy Lab

LG's Energy Lab in northern France is a purpose built and innovative RandD testing centre dedicated to commercial and residential products in heating, ventilation and energy efficient air conditioning products. Equipped with complete monitoring and control systems the Energy Lab is tracked and analysed by teams of research and development engineers ensuring efficiency and reliability during the whole product life cycle. Northern France was chosen to site the Lab due to the harsh weather conditions in the region, low temperatures and high humidity.

LG After-sales Support

Everyone can expect a high level of service from LG, from the air conditioning installer through to the end user. The confidence LG has in its products is reflected in the companies warranty package.

- 10 year compressor part warranty on RAC products
- 3 years for all parts and labour contribution
- Optional extended 5 years on parts on SAC and Multi V products¹
- Optional extended 7 years on parts and labour contribution on Therma V products¹
- Free technical product training and CIBSE accredited CPD seminars
- SMSM or email fault code diagnostics
- Approved installation commissioning scheme
- Dedicated spare parts division
- TM44 CIBSE Energy inspections

LG Specialist Installer

LG Si (Specialist Installer) are independent installation companies, who have attended LG technical product training courses and system commissioning, they have highly competent and skilled engineers.

Being an LG Si, provides the end user with peace of mind that their LG systems will be installed for maximum performance and increased energy savings.

TOP FEATURES

Compact Size

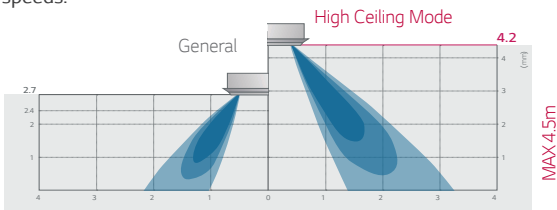

The cassette units are slim with compact dimensions enabling installations in various spaces.

Standard Inverter	Height
7.1-8.0kW	204mm
100kW	246mm
12.5-15kW	288mm

High Ceiling Mode

The BLDC fan motor is more efficient than a conventional AC motor offering an additional 40% energy savings at low speeds and 20% at high speeds.

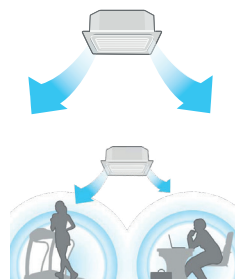

Auto Elevation Grille

Easy filter cleaning with elevation grille*

Independent Vane Operation

*Except CT09, CT12, CT18

H-INVERTER / COMPACT UNITS

MULTI V 5 OUTDOOR UNITS

LG's Multi V 5 range offers a common outdoor unit model with the possibility to connect to: fan coils, air handling units, hydro kits for hot water production, heat recovery ventilation units and an array of control integrations. With the introduction of Multi V 5, LG have made the outdoor unit selection even easier than before with a common chassis between heat pump and heat recovery systems. A change to system application once tenants have moved into the building has now never been easier. Multi V 5 allows a building that has previously been installed with an LG Multi V 5 Heat Pump system to switch to Heat Recovery via a simple piping modification.

OUTDOOR VRF	MULTI V 5		LIST PRICE
