

Rutland Marine Mounting Kits

Rutland Marine Mounting kits offer easy installation of the Rutland 503 and 913 windchargers on any sailing boat. The kits are supplied pre-drilled for mounting of the windcharger and include all fasteners for assembling the pole and attaching guys or stays. (Guy wires/stays are supplied by the user to suit installation).

Also available for customers own tower designs are short sections of polished stainless steel tube, pre-drilled to suit each type of windcharger.
